FAN (B)

**Förderkreis für allgemeine
Naturkunde (Biologie)**

Grant application

A. Summary

1. Applicant

Name

Address

Contact information

Email:

(phone number):

2. Project title

3. Site and duration of the projects field work part

Site:

Start:

End:

4. Total budget requested

B. Application details

5. Scientific aims

Specify the overall aim of the proposal (one sentence).

6. Brief overview of the current knowledge

Summarise the current knowledge in the field of your project. Include a comprehensive list of the relevant literature. Limit to maximal 2 pages.

7. Project description

Provide a detailed step by step description how the aim will be achieved. Include and discuss possible alternative strategies and approaches.

8. Working programme and schedule

Detail when and where the individual stages of the project (e.g. field work, data analysis) will be performed.

9. Project costs

Calculate the costs for the individual stages. Please refer as well to existing support from other funding sources. Detail which part(s) of the project will need initial funding (max. 65% of total requested budget).

10. CV of the applicant

Provide a brief CV revealing your motivation for the proposed project. Cite all relevant publications (conferences, journal articles, books websites ...).

11. Final remarks

Provide any additional information that could be relevant for the success of your application.

12. Please answer the following question

(does not affect the success of your proposal)
